

## Separation of Glucose Oligomers

Data# B-076

Eluent : Water / Acetonitrile = 100 / 2.5

Eluent : Water / Acetonitrile = 100 / 2

Retention Time (min.)

|                |  |            |
|----------------|--|------------|
| Column         | Mightysil RP-18 GP Aqua 250-4.6mmØ 5µm |            |
| Flow Rate      | 1.0mL / min.                           |            |
| Detection      | RI                                     |            |
| Temperature    | Room Temperature                       |            |
| Sample Volume  | 20µl                                   |            |
| Detected peaks | Mixture of Glucose Oligomer<br>DP4~20  | 25 mg / mL |
